56% Increase in conversions

4x ROAS for Remarketing Audience Lists

Search Ads

How Owl Labs achieved a 60% lower CPA with Microsoft's Search Ads

The goal

Owl Labs has transformed the way hybrid and remote workers connect in today's anywhere-work world, with their award-winning smart video conferencing technology.

To increase brand visibility, drive engagement, optimize conversions, and revenue generation for its video conferencing solutions, Owl Labs partnered with Microsoft Advertising and InMobi to launch a multi-channel acquisition campaign that would deliver results across the full funnel.

The solution

Owl Labs optimized its campaigns with multiple bidding strategies. Search and Dynamic Search Ads automatically targeted high-intent users by dynamically generating ads based on website content, in response to search queries.

Audience and Extensions tailored messaging to specific audience segments, while global location targeting expanded reach. Shared negative keywords simplified applying entire lists of negative keywords across multiple campaigns. Lastly, seamlessly importing previously created Google Ads expedited the Microsoft Advertising campaign setup.

"With Microsoft Advertising, we have witnessed impressive growth in clicks, conversions, and revenue for Owl Labs' products, demonstrating the effectiveness of our campaign."
